GMUND

ICC Profil lakepaper Blocker
—

INFORMATION

Notes
- The general printing information applies to Blocker.
- The ICC Profile does not guarantee perfect printing outcomes. Gmund cannot accept liability because many other parameters influence the printing process.
- It is strongly recommended that the printing plant test and verify the profiles and the printing outcomes before beginning the commercial print run.
- Recommendations from the manufacturers of the software, machines, printer's inks, etc. should be complied with when printing and processing.
- Gmund cannot accept liability for damages resulting from faulty applications and incorrect settings.

Download
- We assume that the users of the Blocker ICC Profile have practical experience with professional color management and are familiar with the ICC Profiles.
- Please comply with all specifications from the manufacturers of your devices and software.
- Load the Profile onto your computer.
- Add the ICC Profile to the system folder in "ColorSync Profiles".
- Afterwards, the Profiles are available in a program that the ICC Profiles support

Settings
- The entire printing process, including the printing press settings, must comply with the ISO 12647 standard.
